03

WE'RE PERPETUALLY IMPROVING

"We're perpetual suit of new and innovative ways to consistently improve ourselves, our products, and everything we do."

04

■ PALM KERNEL SHELL

Palm kernel shell is a by-product in the production of palm oil and is commonly used in the natural biomass energy industry. Palm kernel shells (or PKS) are the shell fractions left after the nut has been removed after crushing in the Palm Oil mill. It is a fibrous material, brownish-yellow in colour and can be easily handled in bulk directly from the product line to the end use. Due to its high calorific value, averaging 4000 Kcal/kg, and low ash content, it is considered an attractive source of fuel in the production of energy from renewable sources.

Common Name	Palm Kenel Shell (PKS)
Local Name	Cangkang Sawit
Species	Elaeis guineensis
Origin	Indonesia
HS Code	14049091

Our Product

■ PALM KERNEL EXPELLER

Palm Kernel Expeller (PKE) is a by-product of the palm oil extraction process from the fruit of the palm. PKE is a quality stock feed containing high levels of crude protein and medium energy levels.

It is completely safe to feed as a supplement for most classes of livestock. PKE is ideally suited to feeding in conjunction with high energy feeds such as molasses or Biscuit Cereal Meal.

Common Name	Palm Kenel Shell (PKE)
Local Name	Elaeis guineensis
Species	Kernel Sawit
Origin	Indonesia
HS Code	23066090

Thankyou.
